COMPUTERIZED CALIBRATION DATABASE SERVICE

Bullseye calibration also provides a complete Gage Calibration and Recall System, which many companies require for government and commercial audit programs. This system conforms to all MIL-STD's, MIL-Q specifications and the latest ISO-9000 requirements. Upon acceptance of the quotation for your company we will provide the following services:

- 1) Set up of Calibration Database by customizing record and reports formats with your company information.
- 2) Input all gage calibration and historical information from your master gage listing, or we will visit your company site and collect gage information.
- 3) Maintain database for calibration of gages by utilizing certificates of calibration while updating records for gage historical data.
- 4) Maintain database for gage recall to provide your company with a monthly recall report one week prior to the month gages are due for calibration.
